REINFORCED STRAIGHT ANGLE DESIGN
for a more ergonomic operation

ip-tube™

a specialty endotracheal tube developed by Zeus Medical, is designed for robust operation in interventional pulmonary (IP) procedures. With its unique design, reinforced tube material, ip-tube™ features:

1. Enhanced tube stability to improve IP procedure precision
2. Straight angle design for more ergonomic operation
3. Larger inner diameter (ID)/outer diameter (OD) ratio
4. Dual Murphy eyes to improve ventilation with lower airway pressure and resistance.
5. Forward bevel to increase access to paratracheal nodes.
6. No tube cutting! No tube dislodging! No disconnection to ET connector!

ip-tube™, is intended for IP bronchoscopy procedures, including both diagnostic and therapeutic bronchoscopy. Most common problems encountered during IP procedures can be eliminated by replacing conventional ET tubes with the ip-tube™.
